**\*\*MAC address or Physical Address is a unique identifier** (eg. 10-60-4A-7A-8B-25) of a device viz. computer/laptop /mobile/tablet assigned to its network interfaces for communication with the network segment. Given below are the steps to be followed to get the MAC address of devices on different platforms:

- **Windows OS**: Right click on Network icon on the desktop. Choose Properties --> Local Area Connection --> Details (The Physical Address is the MAC address)
- **Android** : Select Settings --> About --> Status --> WiFi MAC address
- **iPhone iOS** : Select Settings --> General --> About --> MAC address is listed as WiFi Address
- **Mac OS** : Select System Preferences --> Choose Wi-Fi --> Advanced --> Hardware --> MAC address

**In case of assistance, kindly contact EPABX Ext: 159 or 138 or 137.**
